

The chart displays two time series: 'Predicted (validation)' (blue line) and 'Actual Timeseries' (black line). The x-axis represents time steps, with labels at -01, -07, -01, -07, -01, -07, -01, and -07. The y-axis represents values, with horizontal dashed grid lines. Both series show a general downward trend over time. The Predicted series starts at a higher value than the Actual series and ends at a higher value, indicating a consistent positive bias in the predictions.
