

The chart displays two time series from 2017 to 2021. The 'Actual Timeseries' (black line) and 'Predicted (validation)' (blue line) are highly correlated. Both series show a significant dip in early 2017, followed by a rise to a peak in mid-2017. They then experience a sharp decline in early 2018, followed by a recovery and another peak in mid-2018. A major trough occurs in early 2019, followed by a recovery and a peak in mid-2019. Another sharp decline is seen in early 2020, followed by a recovery and a peak in mid-2020. The series ends with a slight decline in early 2021. The predicted values closely track the actual values throughout the period.
