

The chart displays two time series: 'Predicted (validation)' (blue line) and 'Actual Timeseries' (black line). The x-axis represents years from 2017 to 2021. The y-axis has five horizontal grid lines. The predicted series generally follows the trend of the actual series but shows significant deviations in 2017 and 2020, where it peaks higher than the actual data.

Year	Actual Timeseries (approx.)	Predicted (validation) (approx.)
2017	3.5	4.5
2018	3.5	3.5
2019	3.5	3.5
2020	3.5	4.0
2021	3.5	3.5
