

The chart displays two time series: 'Predicted (validation)' (blue line) and 'Actual Timeseries' (black line). The x-axis represents time steps from -10 to 0, and the y-axis represents values from 0.00 to 0.04. The predicted values closely track the actual values, with a slight upward trend in the middle section (around time step -5) where the predicted values are slightly higher than the actual values.
