

The chart displays two time series: 'Predicted (validation)' (blue line) and 'Actual Timeseries' (black line). The x-axis is labeled with values -01, -07, -01, -07, -01, -07, -01, and -07. The y-axis represents the magnitude of the variable 'x'. The predicted series closely tracks the actual timeseries, indicating a high level of model performance. Both series show a general downward trend over time, with some fluctuations.
