

The chart displays two time series from 2017 to 2021. The 'Actual Timeseries' (dark blue line) shows significant fluctuations, with peaks around 2017, 2018, 2019, 2020, and 2021, and sharp drops in late 2017, late 2018, and late 2020. The 'Predicted (validation)' (blue line) is smoother, capturing the general trend of the actual data but missing the extreme peaks and troughs. The legend in the bottom-left corner identifies the two series.
