

The chart displays two time series from 2017 to 2021. The x-axis represents years, with labels for 2017, 2018, 2019, 2020, and 2021. The y-axis represents values, with horizontal dashed grid lines. The blue line represents the 'Predicted (validation)' data, and the black line represents the 'Actual Timeseries' data. Both series show a strong seasonal pattern, with peaks occurring roughly every 12 months. The predicted values closely follow the actual values throughout the period, demonstrating high predictive accuracy.
