

The chart displays two data series over a five-year period from 2026 to 2030. The 'Actual Timeseries' (dark blue line) shows high volatility, with values ranging from approximately 1.0 to 4.0. The 'Predicted (validation)' (light blue line) shows much lower volatility, remaining relatively stable around a mean value of approximately 2.5. The legend in the bottom-left corner identifies the two series.
