

The chart displays two time series from 2026 to 2030. The 'Predicted (validation)' series (blue line) exhibits significant volatility, with values ranging from approximately 0.05 to 0.95. It shows a clear seasonal pattern with peaks occurring roughly every 12 months. The 'Actual Timeseries' (dark blue line) is more stable, with values ranging from approximately 0.05 to 0.45. It also shows a seasonal pattern but with much lower amplitude than the predicted series. The legend indicates that the blue line represents the 'Predicted (validation)' series and the dark blue line represents the 'Actual Timeseries'.

Year	Predicted (validation)	Actual Timeseries
2026	0.95	0.15
2027	0.95	0.35
2028	0.95	0.35
2029	0.95	0.35
2030	0.95	0.35
