

The chart displays two time series: 'Predicted (validation)' (blue line) and 'Actual Timeseries' (black line). The x-axis represents time steps from -10 to 0, and the y-axis represents values from 0.0 to 1.0. The predicted values closely follow the actual values, showing a general downward trend with some fluctuations. The predicted values are slightly higher than the actual values in the middle section of the chart (around time step -5).
