

The chart displays two time series from 2017 to 2021. The 'Actual Timeseries' (dark blue line) shows significant volatility with major peaks in early 2017, early 2018, early 2019, early 2020, and early 2021, and major troughs in late 2017, late 2018, late 2019, and late 2020. The 'Predicted (validation)' (blue line) follows the general trend but is smoother, capturing the overall movement while missing some of the sharp fluctuations seen in the actual data.
